JASON EMENHISER

TECHNICAL OPERATIONS | BUSINESS SYSTEMS | AI-ASSISTED INTERNAL TOOLS

Perryville, MD | 443.640.5426 | emenhiser.jason@gmail.com

PROFESSIONAL SUMMARY

Technical operations professional with 25+ years of IT experience and hands-on warehouse systems support. Combines infrastructure troubleshooting, operational process knowledge, and SQL investigation with AI-assisted application prototyping using Codex. Builds practical tools to explore WMS data, investigate order issues, and make complex workflows easier to understand. Experienced in translating user needs into technical solutions, documenting procedures, and coordinating with vendors and operations teams.

CORE CAPABILITIES

Business systems support • Workflow analysis • Root cause investigation • Internal tool prototyping • AI-assisted development (Codex / ChatGPT) • SQL / MariaDB • WMS data analysis • Technical documentation • User support and training • Vendor coordination

Systems: SALT WMS, FDM4, Locus robotics, ZPL, Windows, Microsoft 365, Active Directory, Exchange, SCCM, VMware / vSphere, Hyper-V, SAN, Fortinet, Sophos, Cisco, VPN / MFA, Teams / VoIP

SELECTED TECHNICAL PROJECTS

WMS Data Exploration & SQL Query Prototype

AI-assisted development using Codex, SALT schema, and MariaDB

- Built a prototype query application with a manual query builder and navigation to explore warehouse data; incorporated a read-only query guard.
- Mapped table relationships and operational status codes to support order research and make database structure easier to navigate.
- Investigated order deletion using audit records, actor identifiers, and checks against existing order headers.

Order Comparison & Workflow Investigation

WMS application behavior and database analysis

- Analyzed browser HAR captures to understand WMS requests and inform SQL queries for operational investigation.
- Developing side-by-side order comparison and difference reporting to identify inconsistencies between application views and database records.

PROFESSIONAL EXPERIENCE

Technology Supervisor — Promoted from Warehouse Technology Technician

ALO Yoga / Northeast Maryland Distribution Center | Abacus Staffing | 2025–Present

- Support SALT WMS, FDM4 workflows, Locus robotics, printers, and warehouse devices used in fulfillment operations.
- Troubleshoot hardware, connectivity, software, and process issues; document findings and coordinate escalation with IT and vendors.
- Create and modify ZPL labels; perform equipment inspections and maintain parts and tote inventory.
- Support technician training, candidate interviews, and shift coverage while identifying opportunities to improve operational processes.

PROFESSIONAL EXPERIENCE — CONTINUED

Systems Engineer

Bogdan Computer Services, Inc. | *2013–2024*

- Delivered IT support and infrastructure services for business clients and government contracts, including Maryland State Police.
- Designed, implemented, and maintained Windows environments; diagnosed issues across servers, endpoints, and network infrastructure.
- Managed VMware ESX / vSphere and Hyper-V environments; administered SCCM deployments, patching, and system updates.
- Configured and supported Fortinet, Sophos, and Cisco firewalls, VPN connectivity, and multifactor authentication.
- Installed and maintained switching, wireless access points, surveillance systems, and Asterisk, Mitel, and Teams voice solutions.
- Created technical documentation and standardized procedures; trained end users and junior staff on systems and recurring support issues.

IT Support Technician

EZShield Identity Protection | *2012–2013*

- Resolved help desk requests through JIRA and supported virtualization, SAN infrastructure, operating systems, and software updates.
- Worked with vendors on escalated issues and provided user training to support system adoption.

Network / Systems Administrator

Ulla Popken USA | *2009–2012 and 1999–2007*

- Maintained business systems and network infrastructure, performed updates, and supported users and operational reporting.
- Supported website maintenance, business data workflows, staff training, and technical documentation.

Independent IT Contractor

ITNGD | *2008–2009*

- Provided network, hardware, and software troubleshooting for small businesses and residential clients; implemented backup and security solutions.

System Administrator

USA Home Loans | *2007–2008*

- Maintained systems, backups, and security protocols; supported users and coordinated vendor relationships and infrastructure improvements.

ADDITIONAL EXPERIENCE

eCommerce Operations & Technical Support — Part-Time

Etsy / eBay Business | *2022–Present*

- Built spreadsheet inventory tracking and supported listing data, digital asset organization, sales analysis, and fulfillment workflows.

Family Care Support

Perryville, MD | *2024–2025*

Assisted with scheduling, records organization, logistics, and day-to-day coordination in a family caregiving environment.
